

ANDEEN-HAGERLING, INC.

manufacturers of the world's most accurate
capacitance bridges and standards

New Product Announcement

Model AH2700A-Option-E

Andeen-Hagerling Inc. is proud to announce a new product! AH2700A-Option-E is an "Enhanced" performance version of our current model AH2700A. It offers substantially improved measurement performance over the full operating range of the bridge. Some graphs showing selected preliminary accuracy specification for the Option-E (as compared to the standard AH2700A) are shown on the back.

At 1 kHz, the AH2700A-OptionE performance is the same as our previously offered single-frequency bridge, model AH2500A-Option-E. Andeen-Hagerling has plans to offer an Option-E version of our current 1 kHz single-frequency bridge, model AH2550A, following the introduction of the AH2700A-OptionE.

The AH2700A-OptionE can be ordered with Option-C (Continuous Frequency Option) if desired. We plan to start accepting orders for AH2700A-OptionE in 2013. Please feel free to contact Andeen-Hagerling for additional details.
